Excerpt: . . . the development of astronomical physics. One portion of the journal is to be devoted to general astronomy, whilst the other deals with astro-physics. The editor of the former is Mr. V. W. Payne, who so ably conducted the *Sitzber. Akad. Wiss. Berlin*, and the latter section is under the charge of Prof. G. E. Hale, whose excellent works on solar prominence photography are known to all spectroscopists. If the editors can fill future numbers of the journal with so many interesting and important articles and notes as make up the first number, they will attain a well-deserved success. Many of the articles have been published in other journals, but this, of course, does not in the least detract from the value of the new journal. The literature of spectroscopy is truly said to be widely scattered, and Prof. Hale is doing a meritorious work in bringing it all together. . The country traversed is typical of the centre and north of the country. Korea Mr. Campbell said, is a land of mountains. Go where you will, a stretch of level road is rare, and a stretch of level plain rarer...
