# Computer-Aided Systems Engineering for Flight Research Projects Using a Workgroup Database

Filesize: 2.37 MB

## Reviews

This ebook is very gripping and fascinating. Sure, it is engage in, nevertheless an amazing and interesting literature. It is extremely difficult to leave it before concluding, once you begin to read the book.

(Ms. Ora Buckridge)

# COMPUTER-AIDED SYSTEMS ENGINEERING FOR FLIGHT RESEARCH PROIECTS USING A WORKGROUP DATABASE

To get Computer-Aided Systems Engineering for Flight Research Projects Using a Workgroup Database PDF, remember to refer to the button below and save the document or get access to other information which might be in conjuction with COMPUTER-AIDED SYSTEMS ENGINEERING FOR FLIGHT RESEARCH PROJECTS USING A WORKGROUP DATABASE book.

BiblioGov. Paperback. Book Condition: New. This item is printed on demand. Paperback. 28 pages. Dimensions: 9.7in. x 7.4in. x 0.1in.An online systems engineering tool for flight research projects has been developed through the use of a workgroup database. Capabilities are implemented for typical flight research systems engineering needs in document library, configuration control, hazard analysis, hardware database, requirements management, action item tracking, project team information, and technical performance metrics. Repetitive tasks are automated to reduce workload and errors. Current data and documents are instantly available online and can be worked on collaboratively. Existing forms and conventional processes are used, rather than inventing or changing processes to fit the tool. An integrated tool set offers advantages by automatically cross-referencing data, minimizing redundant data entry, and reducing the number of programs that must be learned. With a simplified approach, significant improvements are attained over existing capabilities for minimal cost. By using a workgroup-level database platform, personnel most directly involved in the project can develop, modify, and maintain the system, thereby saving time and money. As a pilot project, the system has been used to support an in-house flight experiment. Options are proposed for developing and deploying this type of tool on a more extensive basis. This item ships from La Vergne, TN. Paperback.
